 Better by Design
 India's No.1 Windows & Doors Brand

Framing the future

How Fenesta elevates architecture through innovation and detail

WORDS MALLIKA ADVANI PHOTOS COURTESY FENESTA

Across diverse cities in India, architects today are approaching fenestration as a decisive design tool rather than a background element. Whether shaping sustainable residences, framing green views, enabling seamless indoor-outdoor transitions, or refining light-filled interiors, windows and doors are central to how space is experienced. Fenesta's high-performance systems – ranging from slim aluminium profiles and concealed solutions to energy-efficient glazing and versatile door offerings – support this evolving approach with reliability, customization, and precise engineering. In doing so, they help architects balance aesthetics with insulation, durability with elegance, and innovation with everyday comfort – making Fenesta a consistent partner in crafting enduring spaces. fenesta.com

VINAY MAHAJAN
KVP CONSULTANTS, AMRITSAR

Founded in 2009, Vinay Mahajan of KVP Consultants, Amritsar, has shaped his practice around sustainability. Across projects in Amritsar, Jandiala, Batala, and Gurdaspur, he integrates Fenesta fenestrations for their high-performance, future-ready systems that align with his design ethos. Their concealed systems, in particular, enhance both style and functionality, pairing clean aesthetics with superior performance. Speaking of Fenesta, Vinay says, “Window fittings have really evolved over the years, where they now contribute as much to usability as to visual appeal.” He also values Fenesta’s seamless service and reliable quality which supports his consultative, client-focused approach to creating spaces that are sustainable, functional, and enduring.

SHIVANI DHIMAN NARANG
ARCHELEMENTARY, PANCHKULA
Instagram: @Panchkula

With over 14 years of practice, Shivani Dhiman Narang of Arch Elementary, Panchkula, designs spaces that balance function, emotion, and context. “My philosophy emphasizes openness, natural light, and seamless transitions between spaces,” she describes. “Fenesta fenestrations align perfectly with this approach by offering sleek profiles, durability, and superior performance.” From a French arch window lending timeless symmetry to a classical home to expansive aluminium openings that blur indoor-outdoor boundaries while ensuring sound insulation, Fenesta’s solutions combine elegance with intelligent engineering. She particularly values its innovations in high-performance glazing and ultra-slim frames, along with their emphasis on energy efficiency and weather-resistant systems that align with the evolving demand of modern homes.

HRISHABH SHARMA AND MOHIT KASHYAP
WALLS-FORMING A THINKING, GHAZIABAD
wallsconcepts.com

For the past six years, Ghaziabad-based Hrishabh Sharma and Mohit Kashyap’s firm, Walls – Forming A Thinking, has delivered residential, commercial, and industrial projects alongside interior design solutions, guided by a philosophy of simplicity, clarity, and timeless elegance. “We believe in creating spaces that are minimal yet refined,” they say, noting how Fenesta fenestrations – with their clean lines, slim frames, and generous natural light – align seamlessly with their aesthetic. “Slim-profile systems have transformed the way we see windows and doors, bringing in greater light and openness,” they continue. For the firm, elegance lies in restraint and in crafting spaces that are functional, enduring, and impactful – an approach that resonates with Fenesta’s refined, high-performance systems.

SAKSHI JAIN AND JITENDER SINGH
NUTSHELL ARCHITECTS, HARAYANA
Instagram: @nutshell_architects

For Sakshi Jain and Jitender Singh of Nutshell Architects in Haryana, user-centric design is paramount, with each project responding thoughtfully to its surroundings while prioritizing natural light, sustainability, and human comfort. They have incorporated Fenesta systems into contemporary residential projects where daylight, ventilation, and thermal comfort were key considerations. “These systems allowed us to create large openings and seamless indoor-outdoor connections without compromising on sound insulation or durability,” they explain. Fenesta bridges refined aesthetics with technical reliability, supporting clean, minimal profiles while enhancing noise reduction and energy efficiency. Its customization options and precision manufacturing resonate with their commitment to practical, comfortable, and well-crafted spaces.

AMBER CHANDGOTHIA
AMBER CREATIONS, KOLKATA
ambercreations.in

Amber Chandgothia of Amber Creations, Kolkata, founded his practice in 1995. His philosophy centres on detail-driven, minimal, and functional design – guided by value engineering, cost-effective, low-maintenance solutions, and a belief that form follows function. He recently incorporated Fenesta’s fenestrations in a duplex apartment within a reserve forest in Dehradun, nestled among tall trees, where seamless windows frame uninterrupted views of the landscape. Among Fenesta’s innovations he values most are sliding and folding window options that open up expansive views of the sky, wood-finish louvered casement shutters that combine classical aesthetics with functionality, and meshed ventilation slots in casement or top-hung windows that enable fresh air circulation. He also values their constant innovation, allowing for greater versatility and well-engineered solutions.

NAVEET GARG
GARG ASSOCIATES ARCHITECTS, BATHINDA
Instagram: @gargnaveet

Naveet Garg of Garg Associates Architects, Bathinda, began his practice in 2014 with a clear vision to create spaces where luxury meets refined taste. Fenesta’s fenestration systems strongly align with his studio’s sensibility, offering stylish, well-engineered products with superior finishes. In a recent project in Bathinda, he incorporated Fenesta Aluminium, uPVC, EWD, and WPC doors, appreciating their seamless integration into his designs. “They offered practical, secure locking solutions along with a wide range of handle options,” he notes. His design process centres on thoughtful concept development, precise material selection, and careful execution to ensure every detail reflects quality and finesse – an approach complemented by Fenesta’s end-to-end solutions, diverse product range, refined finishing, and reliable after-sales service.
