

Fenesta
Better by Design
India's No.1 Windows & Doors Brand

Framing the future

Six architects across India reveal how Fenesta's innovative window and door systems help them balance performance and design clarity

Windows and doors do more than frame a view – they influence how we feel, move, and live within a space. Across India, architects are reimagining fenestration as an active design element: one that modulates light, maintains thermal and acoustic insulation, and bridges the indoors with the outdoors in expressive, intentional ways. From quiet city sanctuaries to climate-conscious homes, Fenesta's versatile systems are helping designers build spaces that are both beautiful and high-performing, quietly transforming the way architecture is experienced. fenesta.com

W5 ARCHITECTS
PRAKHAR RANJAN, GORAKHPUR
Instagram: @w5architects

For the past seven years, W5 Architects in Gorakhpur has brought culturally rooted, climate-responsive design to tier-2 and tier-3 towns. Founder Prakhhar Ranjan’s philosophy of restraint and contextual detailing aligns naturally with Fenesta’s precise yet flexible systems. In both high-end and mid-scale residential projects, the studio relies on Fenesta for its clean finishes, reliable performance, and wide range of solutions—from sliders to tilt-and-turn windows. “In non-metro markets, consistent quality and strong after-sales support matter, and Fenesta delivers on both,” says Prakhhar. Their products allow for large, well-insulated openings that balance scale and subtlety — supporting W5’s vision of minimal, material-forward architecture without compromising comfort or aesthetics.

IRA CREATIVE DESIGN STUDIO
PRIYANKA GAJAWADA & RAVIKANTH BAJAJ, HYDERABAD
iracreativedesignstudio.com

Ira Creative Design Studio, founded in 2016 by Priyanka Gajawada and Ravikanth Bajaj, blends modern methods with traditional craft to create thoughtful spaces tailored to individual lifestyles. While they’ve worked with Fenesta for years, it was in their project Aavrit, that the brand’s expertise helped them connect indoors and outdoors through large openings using laminated and double-glazed windows. “The sleek, modern aesthetics of Fenesta products complement the architectural language of our projects, providing uninterrupted views and enhancing the natural lighting,” they say. With its durable, customisable systems, Fenesta supports the studio’s commitment to functional, cost-effective, and visually refined solutions.

Y POSITIVE STUDIO
SANDEEP YEOLA, NASHIK
Instagram: @ypositivedesignstudio

Driven by a deep curiosity about how space shapes human experience, Sandeep Yeola founded Y Positive Studio in Nashik in 2001 with a philosophy focused on creating spaces that are functional, timeless, and connected to their context. Over the years, Fenesta has been a trusted partner across multiple projects, especially in their high-end bungalows, where its fenestration systems have been key. One of Yeola’s favourite innovations is the evolution of slim-profile, high-performance sliding systems in windows and doors. “Today, windows and doors are no longer just functional elements,” he says. “They’re architectural features that shape the entire spatial experience. Fenesta’s systems allow us to create seamless indoor-outdoor connections, maximize natural light, and maintain thermal and acoustic comfort, all while maintaining a clean, minimalist aesthetic.”

DJ ASSOCIATES
DEVYANI JAISWAL, KOLKATA
Instagram: @architect.devyani.jaiswal

For over two decades, Devyani Jaiswal’s DJ Associates in Kolkata has strived to design spaces that are timeless, sustainable, and deeply attuned to the people who inhabit them. “Our role as architects is to translate our clients’ narratives into meaningful form,” she says. That sensitivity extends to every detail — including fenestration. In a recent residential project, she chose Fenesta for its exceptional quality, durability, and sleek design options. “What I find most interesting about Fenesta is their seamless blend of technology, design versatility, and performance,” she notes. The UPVC windows brought in natural light, improved ventilation, and offered thermal insulation, crucial for Kolkata’s humid climate, while integrating effortlessly into her modern, climate-responsive design.

SPA DESIGN STUDIO
SUPRIYA NATHE & PRASHANT NATHE, NASHIK
Instagram: @supriyanathe, @ar_prashant_nathe

Founded in 1993 by Supriya and Prashant Nathe, SPA Architects is guided by a philosophy of building with nature and creating green architecture with minimal footprint. Their work focuses on crafting structures that are seamlessly integrated with the landscape. To support this vision, Fenesta has become their window partner of choice. “Fenesta allows us to create soundproof spaces with thermal comfort, while enabling expansive openings that seamlessly connect the interiors with the surrounding landscape.” In a recent retrofitted bungalow in Nashik, located along a busy road but overlooking a lush jogging track, Fenesta’s DGU glass provided the ideal solution: expansive views paired with a serene, noise-free interior.

DESIGNN LUXE STUDIO
SHWETA SHUKLA, ZIRAKPUR
Instagram: @designn_luxe

Shweta Shukla, founder of Designn Luxe Studio in Zirakpur, believes in designing with purpose, harmony, and emotion, where every detail strikes a balance between aesthetics and practicality. Fenesta has played a vital role in elevating both the visual and functional quality of her projects, offering the perfect blend of modern aesthetics, smart engineering, and long-term reliability. For a residential villa in Mohali’s IT City, she selected Fenesta’s uPVC windows and doors for their superior insulation, noise reduction, and aesthetic appeal. “Fenesta doesn’t just create windows and doors — it creates an experience of elegance, functionality, and lasting value,” she says. “It empowers us to deliver spaces that are beautiful, functional, and built to last, perfectly aligning with our design vision.”
