

Fenesta
Better by Design

India's No.1 Windows & Doors Brand

Framing the future

Discover how architects harness light, flow,
and design with Fenesta

WORDS MALLIKA ADVANI | PHOTOS COURTESY FENESTA

From Kolhapur to Shimla, architects across the country are using Fenesta systems to connect interiors with the outdoors, harness natural daylight, and elevate both aesthetic and thermal performance. Sleek profiles, sustainable materials, and contemporary glazing let design intentions shine, while efficient engineering and thoughtful innovation enhance

comfort, optimize insulation and maximize usable space. Whether framing Himalayan vistas, creating luminous open-plan interiors, or blending seamlessly with traditional and modern facades, Fenesta's windows and doors are design instruments that transform the way a space is experienced.

STUDIO CITRA
ANNU VERMA, SHIMLA

Shimla-based architect Annu Verma, founder of Studio Chitra, brings a philosophy of sustainable, context-sensitive design to the mountains she calls home. Since founding her practice in 2021, she has shaped spaces balancing modern aesthetics with ecological responsibility. That ethos finds a natural ally in Fenesta’s energy-efficient fenestration systems, used across different projects including a villa across Solan and Shimla. Here, Fenesta’s window frames offer sweeping Himalayan views “ensuring excellent thermal and sound insulation, durability, and weather resistance,” says Annu. She also likes the company’s recyclable uPVC windows, which offer warm insulation while being low maintenance and durable. “Fenesta’s focus on sustainable and thermally efficient products shows its commitment to the environment,” she tells us, making it a top choice for her firm.

STAPATHI CONSULTANCY
ANAND SARDA, NAGPUR
aranandsarda.in

Since 2001, Anand Sarda of Stapathi Consultancy in Nagpur has shaped spaces defined by balance — between form and function, modernity and tradition, and materiality and sustainability. That philosophy finds a natural extension in Fenesta’s fenestration systems, most recently incorporated in a luxury residence in Nagpur, where both thermal performance and elegance were critical. “We wanted to build an open-plan interior flooded with natural light, so we used Fenesta’s large sliding and fixed glass windows to frame the outdoor views. The windows not only ensured insulation but also enhanced the modern character of the home,” Anand tells us. His design language, grounded in light and clean lines, aligns perfectly with Fenesta, whose sleek, versatile finishes complement everything from natural stone and textured walls to warm wood accents.

DESIGNEX
ASHISH ANAND KULKARNI & NEHA ASHISH KULKARNI, KOLHAPUR
internalaffairs.in

For Kolhapur-based DESIGNEX, architecture is as much about people as it is about buildings. Since 2010, the studio’s founders, Ashish and Neha Kulkarni, have championed a client-first philosophy, designing environments that are beautiful, efficient, and attuned to the lives of those who inhabit them. That sensitivity finds a strong partner in Fenesta’s fenestration solutions. With their precision engineering, exceptional quality, and proven energy efficiency, Fenesta windows and doors allow DESIGNEX to deliver what clients value most: comfort, quiet, natural light, and durability, without compromising on style. “Fenesta elevates each project with its unique adaptability and designs that complement various architectural styles, while providing the perfect balance of natural light and ventilation,” the team notes. This makes it a trusted tool in DESIGNEX’s pursuit of user-centric design.

DESIGN AMOUR
KARTIK ALAWADHI, HISAR
Instagram: @designamourarchitecture

Kartik Alawadhi established Design Amour in Hisar in 2021 with a commitment to creating functional spaces that embody simplicity and clarity. Guided by a minimalistic sensibility, where every element carries intent and purpose, he turned to Fenesta in his very first residential project, designing expansive floor-to-ceiling openings that invited abundant natural daylight. Since then, Fenesta has become integral to his practice, enhancing projects in both subtle and striking ways. “On the exterior, they contribute to an elegant, contemporary facade, while inside, their sleek glazing systems ensure visual continuity and bright light,” he tells us. Among the innovations that excite Kartik most is the evolution of sliding window systems. “Their ability to maximize usable space with effortless operation has transformed how windows are integrated into architecture, giving designers greater flexibility and clients a greater sense of comfort and ease,” he explains.

UTKARSH JAIN ARCHITECTS
UTKARSH JAIN, BHOPAL
utkarshjainarchitects.com

Since founding Utkarsh Jain Architects in 2017, Bhopal-based Utkarsh Jain has pursued a philosophy rooted in creating human-centric, sustainable spaces that transform buildings into lived experiences. For him, design is about how people feel and connect with their surroundings – and that’s where Fenesta plays a vital role. Across projects, Fenesta’s thoughtfully engineered systems have helped bring in natural light, openness, and a seamless flow between indoors and outdoors. “They don’t just add functionality – they elevate the experience of being in a space,” he notes. With their clean detailing, durability, and aesthetic appeal, Fenesta aligns perfectly with Utkarsh’s vision of design as deeply experiential. Among his favorite innovations are Fenesta’s sliding systems, which blur the boundaries between indoors and outdoors and allow people to experience an unmatched connection with nature.

VISARCH
ARCHANA GOYAL, JAIPUR

For Archana Goyal, founder of VISARCH in Jaipur, creating living spaces that engage harmoniously with the surrounding world has always been central to her work. In this pursuit, Fenesta windows and doors have become an essential design tool. “Fenesta’s fenestrations play a pivotal role in my projects,” Archana explains. “Their sleek lines and modern glazing integrate perfectly into any setting – residential, commercial, traditional or contemporary, while bringing in abundant light and ventilation and creating a seamless visual flow between indoors and outdoors.” She also vouches for Fenesta’s team support and advanced technology systems. “A solution is always there even for the most unusual queries,” she says, making Fenesta a firm partner in realising her vision of luminous, sustainable, and timeless spaces.
