Solid Panel Doors
One Stop Solution

India's No.1 Windows and Doors brand

Fenesta is a part of DCM Shriram Group established in 1889 with a turnover of over Rs. 14,264 crore. Acknowledged for its transparent work culture and diversity, the integrated business entity's values have inspired trust and built long-term relationships with stakeholders in India and abroad.

Fenesta - India's No.1 brand for windows & doors was launched in 2002. Fenesta is the only company in the country that boasts of a world class infrastructure and has complete control over the entire supply chain of windows and doors manufacturing and installation. It takes all-round expertise in extrusion, design, planning, fabrication, delivery and installation to produce high performance, world-class windows and doors.

With a presence in over 900+ cities across India, Fenesta has the unique distinction of over 5 million installations.

Introducing

Solid Panel Doors

The unique and innovative Solid Panel Doors are an amalgamation of traditional designs and modern innovations. The aesthetically pleasing styles, designs and materials create wonderful experiences, which uplift the aura of any space where they're installed in.

Product Range

- Engineered Wooden Doors
- Hybrid Material Doors
- Designer Doors
- LVL Doors

Actual product may vary from the image

Traditional Ways of Making Doors are Losing Relevance

Wood has traditionally been the material of choice when it comes to doors or furniture. But today it comes with its own set of challenges such as: Selection of the right wood and getting assurance about its genuineness. Whether the wood has been curated to withstand seasonal setbacks of bloating and warping? How will it be installed? And most importantly, how many different people or vendors you have to deal with to get that perfect door for your home? It is no surprise, that people are now refraining from installing wooden doors at their homes.

Complex Process of Carpenter Made Doors

1

WOOD SELECTION

No assurance of wood genuineness, quality and durability

2

LABOUR

Hassles involved in getting the transportation done

3

ON SITE MANUFACTURING

On site fabrication results in mess

4

PASTING OF LAMINATE/VENEER

Manual pasting with glue results in peeling of laminate/veneer

5

INSTALLATION

On site fabrication turns home into a workshop and can damage floors too

6

PAINT AND POLISHING

No guarantee of longevity and precision of manually done paint or polish

7

ACCESSORIES

Cumbersome process of selecting different accessories from different vendors

8

PRONE TO TERMITES

Traditional doors are prone to termite infestations, which can reduce the door's lifespan.

Based on unique innovative solutions, our doors are designed to enhance your lifestyle. Fenesta Doors are factory made and are professionally installed at your site with perfect dimensional accuracy and finish. Thus eliminating any hassles of running around and dealing with multiple vendors such as carpenters, painters and accessories retailers.

Engineered Wooden Doors

Fenesta's range of Engineered Wooden Doors are factory made and completely customisable. These are perfect for both internal and external door applications. Taking inspiration from the traditional designs and combining it beautifully with the modern innovations, these Fenesta doors are truly a work of art.

Made with Legally Sourced Hardwood: more durable, easier to maintain, stronger, better finish and higher fire resistance than soft wood.

Unmatched Finish: Machine polish gives uniformity and longevity. No re-polishing required for 10 years.

UV Curing: Significantly reduces finishing process time while providing superior durability with PU polish. Also, improves resistance to abrasions, chemicals and stains.

Best in Class Treatment of Wood: Moisture treatment of Timber for 45 days to avoid seasonal behavioral changes.

5 years Warranty: The products are covered under Fenesta warranty.

The Superior Choice Over Traditional Carpentry

The amalgamation of modern tech and traditional designs used in our Engineered Wooden Doors outperforms carpenter made doors in every way and provides durability and exceptional quality.

**Traditional Carpenter
Made Door**

- » Prone to scratches
- » Less durable
- » Affected by vagaries of weather
- » Moisture-absorbent
- » Weak bonds
- » Colour fades with time

**Fenesta's Engineered
Wooden Door**

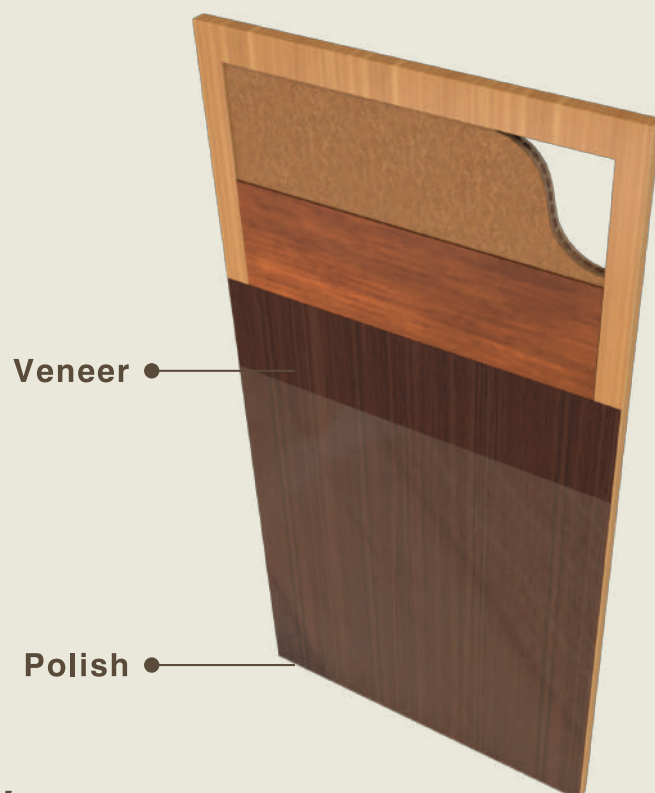

- » Wear-resistant
- » Built to last
- » Weather-resistant
- » Water-resistant
- » Retention of bond strength even in high temperatures
- » Retains sheen & shine

Mindful Towards Sustainability

As a socially conscious brand, we prioritise responsible and sustainable practices in our commitment to a better future. Our wood is sourced from ethical, legal, sustainably managed and FSC certified sources with an intent to being mindful while adding value to the homes and lives of our customers.

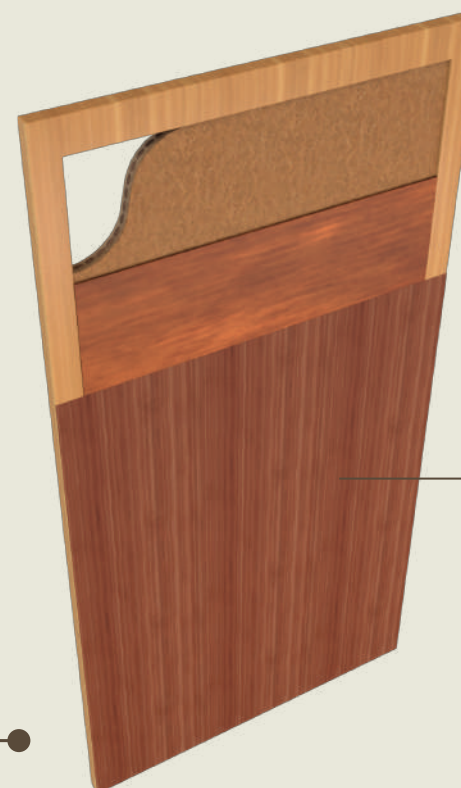

Finished to Perfection. Made to Last.

Choose from our panel options.

Veneer

The natural and aesthetically pleasing grain patterns of Veneer offer admirable look and highlight the simplicity and natural beauty of wood. The wide range of colours available in Veneer helps enhance the aesthetics of your space.

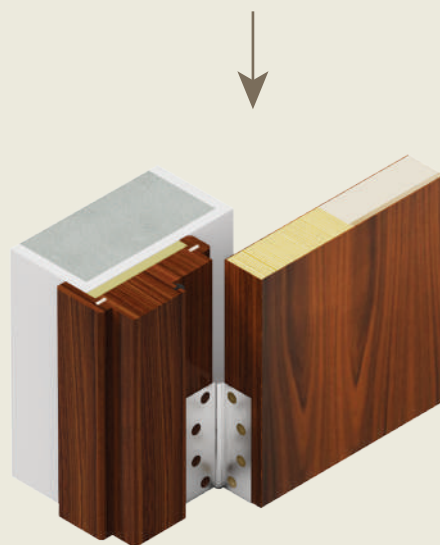

Laminate

The laminates come in various colour options to match any interior mood board. They are also durable, easy to maintain and cost effective.

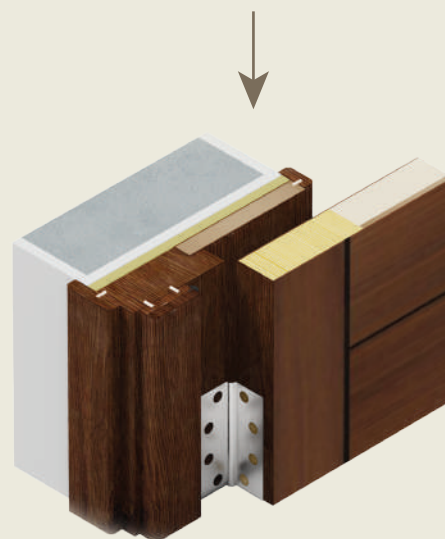

Frames and Architraves

Fenesta Wooden Door frames are made using high quality wood and are factory finished to match the aesthetic look of the door leaf.

LVL Doors

Fenesta's LVL Doors bring together elegant design and smart engineering—ideal for modern Indian homes. With sleek laminate finishes and clean edges, they offer a minimalist aesthetic and dependable performance. Built with Laminated Veneer Lumber (LVL) Material, these doors feature wood veneers for superior strength, stability, and moisture resistance. Pre-finished and installation-ready, LVL Doors eliminate on-site hassles and reduce project time. With durable construction and premium hardware, they're perfect for high-traffic, design-conscious spaces.
